The Winning  
Combination*

## Phoenix Multi Game A Plus Shuffler

**The Phoenix Multi Game A Plus Shuffler** has been developed specifically for a range of table games such as Three Card Poker, Caribbean Stud Poker, Pai Gow Poker, Let it Ride, in continuous single deck format, and Casino War, Blackjack and Mini Baccarat in continuous six deck operation. The Automated Shuffler is an integral part of the game set-up, operation and play, offering a high speed secure game adding over 30% increased profitability due improved play rate and secure operation.

The **Phoenix Multi Game A Plus Shuffler** features an interchangeable design for single card dealing and for multiple card output. It is simple and quick to change the configuration and the shuffler is so easy to use.

Key technology employed in the Shuffler provides a card count when individual cards enter the Shuffler ensuring a correct card count. A rotating wheel with a random number generator feeds and shuffles the cards into different slots on the wheel. The cards are also counted as they are dealt from the shoe revealing the number of cards in the machine, and auditing the card flow during successive games.

The **Phoenix Multi Game A Plus Shuffler** offers value and performance.

The **Phoenix Multi Game A Plus Shuffler** has received global patents for its one-of-a kind design and has been approved by BMM Compliance, satisfying GLL-11 Standards for Gaming Devices in Casinos v2.0, related to standards applicable for Australia and New Zealand markets and also the Macau jurisdiction.

### Phoenix Multi Game A Plus Shuffler

- Ensures the fairness of card games
- Random Number Generator (RNG) for fair and untraceable random shuffles
- Pre-programming option for card games
- Continuously shuffles any number of decks
