Phoenix Smart Shoe

The Phoenix Smart Shoe will 'read' any playing card from any card manufacturer giving the operator the freedom of not being locked into a particular manufacturer. Your choice of card need not be determined by your choice of dealing shoes and visa versa. Other main attributes of this shoe include the easy link with the Phoenix Baccarat Display System which gives the operator a plug-n-play installation for two very important gaming table functions.

Phoenix listens to the needs of the casino operators and develops new products hand in hand with many of the key casinos' management teams in the region. The Phoenix Smart Shoe is the result of such a strategy and is now available for sale.
