Combination

Phoenix Premier Table Limit Sign

Designed to bring a range of networked functions to the gaming table, the **Phoenix Premier Table Limit Sign** features a great range of benefits including the ability to set table limits from the Pit, to send marketing messages directly to the table and to display the previous shoe results giving the casino operator the ability to increase revenue throughout the resort direct from the gaming table.

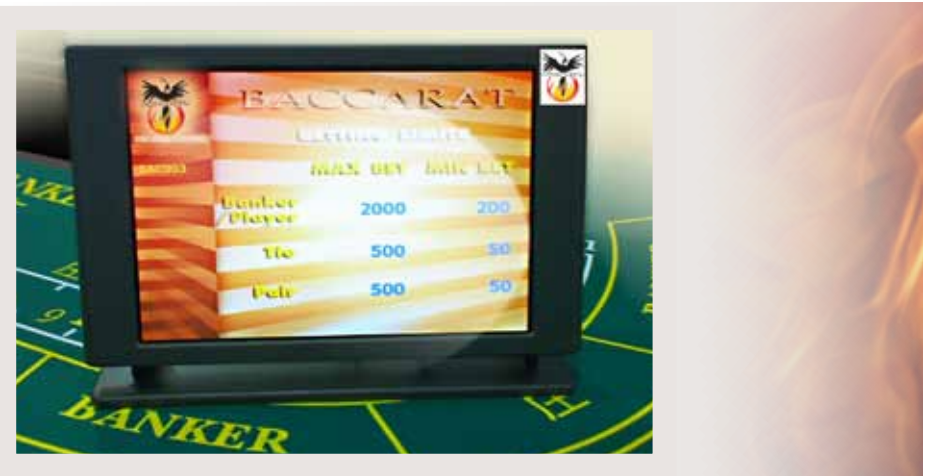

Custom built with endless graphic options, the signage is available in a range of colors and great value pricing.

Traditionally a Table Limit Sign was used for a single purpose, simply the table minimum and maximum betting limits. Why not generate increased profits by using an LCD based, networked table limit sign that allows for a multiple range of display information. For a small additional investment operators can now forget about the cost and focus on the benefits that a Phoenix Premier Table Limit Sign will bring to the casino. Increasing the players experience through awareness of casino wide marketing will increase revenue and ultimately profits.

When you add in the increased productivity from the Dealer the Phoenix Premier Table Limit Sign is an exciting product every casino operator should consider.
